

North America

1. North America is the third largest continent on Earth in terms of landmass and the fourth largest in terms of population; It has 23 countries in it.
2. Greenland is one of the largest islands in the world; unlike Australia, which is an island and a continent, Greenland is not a continent.
3. Every country in North America is connected to the ocean; there are no landlocked countries in the continent. It is surrounded by the Atlantic, Pacific and Arctic oceans.
4. Most people think New York City, USA is the largest city in North America; however, Mexico is the largest city, it has over 22 million inhabitants.
5. Did you know Canada is the largest country in North America and not the United States of America? Canada is also the second largest country in the world, the U.S.A comes third.
6. North America is the only continent that has all five biomes; it has water bodies, forests, grasslands, deserts and tundra.
7. The wealthiest and biggest economies of the world are in North America; they are the U.S.A, Canada and Mexico.
8. The Death Valley is the lowest and driest region in the continent; it receives less than a teacup of rainfall per year.
9. Athletes in North America have won more Olympic medals than other athletes in other continents.
10. North America is the largest producer of corn in the world. It is the most common commodity in the continent...if you love corn, you know where to go.
