## The Incredible Eiffel Tower

The Eiffel Tower is one of the most famous landmarks in the world. It stands in Paris, France, and millions of people visit it each year. In my opinion, it is also one of the most beautiful structures ever built.

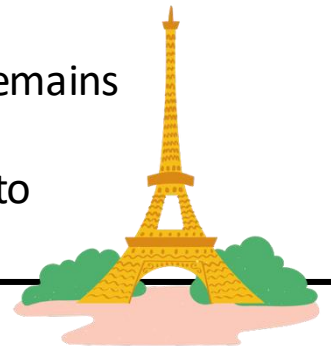

The tower was completed in 1889 and was designed for a large international exhibition. It is about 330 metres tall and is made mostly from iron. When it was first built, it was the tallest human-made structure in the world.

Visitors can travel up the tower and enjoy views across Paris. On a clear day, the view from the top must be absolutely breathtaking!

The Eiffel Tower is covered with thousands of lights that sparkle at night. Many people believe this makes the tower look even more spectacular after sunset.

Although the Eiffel Tower is more than 100 years old, it remains an important symbol of France. Whether you admire its history, its enormous size or its sparkling lights, it is easy to see why so many people find it fascinating.

1. What is one fact about the height of the Eiffel Tower?

---
